

ALTIS Semiconductor Environmental Policy

The environmental protection was always a paramount concern of the site of Altis Semiconductor. For a long time, security, health, environment protection, energy and natural resources conservation are fundamental elements of Altis policy. The results obtained were clearly positive for the environment and the activities of the site.

ALTIS Semiconductor has the ambition to position as best provider for customers of leading edge semiconductor technology. Within this framework the environmental protection plays an essential role.

To answer to these expectations ALTIS is committed implementing the following policy:

- To provide a safe and healthy workplace and ensure that personnel are properly trained and have appropriate safety and emergency equipment.
- To be an environmentally responsible neighbor in the communities we operate, and act promptly and responsibly to correct incidents or conditions that endanger health, safety, or the environment. Report them to authorities promptly and inform parties as appropriate.
- To preserve natural resources by reusing and recycling materials, reducing as much as possible raw material and water consumption.
- To use manufacturing processes that do not adversely affect the environment. Improving operations to minimize waste, prevent air, water, and other pollution, minimize health and safety risks, and dispose of waste safely and responsibly.
- To use in a responsible way energy, by controlling consumption and by reducing them when it is feasible.
- To take part in the efforts made by our industry to improve protection and comprehension of the environment, to share the methods, knowledge and technologies of prevention appropriate to the environmental protection.
- To use when it is possible the expertise of our shareholders IBM and Infineon to contribute to the development of solutions to the environmental problems.
- To be in conformity or exceed all the legal and lawful requirements and the other requirements to which ALTIS voluntarily subscribed. Strive to continuously improve our own environmental management system and our performances. Periodically to inform the public of our actions.

To ensure that the presence of companies tenants on site is compatible with the environmental requirements of Altis semiconductor

- To carry out rigorous audits and self-assessments of ALTIS Semiconductor's compliance with this policy, to measure progress of ALTIS Semiconductor's environmental affairs performance.
- This policy and actions undertake to preserve environment are at the disposal of the public

Every employee and every contractor on ALTIS Semiconductor premises must pursue this policy and report any environmental, health, or safety problem to ALTIS Semiconductor management. Managers are expected to take prompt action.
